

Integrated Pest Management Plan

When completed, this template meets the Healthy Schools Act requirement for an integrated pest management (IPM) plan. An IPM plan is required if a child care center uses pesticides¹

IPM statement

It is the goal of Maxwell Unified School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

We strive to create and sustain a "pest-free" learning environment and to use the least intrusive methods to remove and eradicate pests that support student health and safety.

IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Craig Womble/Maintenance Worker	Monitors and assists IPM Coordinator
Bonnie Piper/Utility Worker	Monitors and assists IPM Coordinator
Kyle Miller/Utility Worker	Monitors and assists IPM Coordinator
Maximum Pest Control	Monitors and applies when necessary
Summer Shadley	Supervisor of IPM Coordinator

Pest management contracting

- ☒ Pest management services are contracted to a licensed pest control business.
Pest Control Business name(s): Maximum Pest Control
- ☒ Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

Pest identification, monitoring and inspection

Pest Identification is done by: MUSD Staff and Maximum Pest Control

(Example: College/University staff, Pest Control Business, etc.)

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by maintenance, custodians, and kitchen staff and results are communicated to the IPM Coordinator.

(Example: District staff title, e.g. Maintenance staff)

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:

(Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)

Glue boards are placed in kitchens and storage areas which are checked daily by kitchen and custodial staff. Garden areas are monitored by utility and maintenance staff for ants and other subterranean pests. All roof attic areas are to be blocked to prevent nesting of pigeons or other birds/bats.

Pests and non-chemical management practices

This child care center has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Mice	☒	☐	☒	☒	☒	☒	☐	
Roaches	☒	☒	☐	☒	☐	☒	☒	Daily collection of garbage
Pigeons	☐	☐	☒	☒	☒	☒	☐	
Gophers	☐	☐	☐	☒	☐	☒	☒	
Ants	☒	☒	☒	☐	☐	☒	☐	
Skunks	☐	☐	☒	☒	☒	☒	☐	

Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This child care center expects the following pesticides (pesticide products and active ingredients) to be applied during the year. (This list includes pesticides that will be applied by school district staff or licensed pest control businesses.):

Nyguard (MGK) EPA#1021-1603; Bifen IT (Control Solutions) EPA#53883-118; Termidor SC (Bell Lab) EPA#7969-210; Demand (Syngenta) EPA#100-1066; Cyper (CSI) EPA#53883-92; Fastrac Blox (Bell Lab) EPA#7969-210

Healthy Schools Act

- ☒ This child care center complies with the notification, posting, recordkeeping, and all other requirements of the Healthy Schools Act.(Education Code Sections 17608 - 17613, 48980.3; Food & Agricultural Code Sections 13180 - 13188)

Training

Every year child care center employees who make pesticide applications receive the following training prior to pesticide

- ☒ Pesticide specific safety training (Title 3 California Code of Regulations 6724) use:
- ☐ School IPM training course approved by the Department of Pesticide Regulation (Education Code Section 16714; Food & Agricultural Code Section 13186.5).

Submittal of pesticide use reports

- ☒ Reports of all pesticides applied by child care center staff during the calendar year, except pesticides exempt¹ from HSA recordkeeping, are submitted to the Department of Pesticide Regulation at least annually, by January 30 of the following year, using the form provided at www.cdpr.ca.gov/schoolipm. (Education Code Section 16711)

Notification

This child care center has made this IPM plan publicly available by the following methods (check at least

- ☒ This IPM plan can be found online at the following web address: www.maxwellusd.net
- ☒ This IPM plan is sent out to all parents, guardians and staff annually.

Review

- ☒ This IPM plan will be reviewed (and revised, if needed) at least annually to ensure that the information provided is still true and correct.

Date of next review: 06/01/2024

I acknowledge that I have reviewed this school district's IPM Plan and it is true and correct.

Signature: Jff / Holino Date: 06/01/2023

¹ These pesticides are exempt from all Healthy Schools Act requirements, except the training requirement: 1) products used in self-contained baits or traps, 2) gels or pastes used as crack and crevice treatments, 3) antimicrobials, and 4) pesticides exempt from U.S. EPA registration. (Education Code Section 17610.5)
